Education

Bachelor of Science in Computer Information Technology

September 2018 – July 2021

Brigham Young University – Idaho

Rexburg, Idaho

- 3.7 GPA
- Java: Started a mobile party-game app using Android Studio and Figma.
- PHP/HTML/CSS/JSON: Collaborated with a team to create functional websites using the MVC structure.
- PL/SQL: Met with a student from Algeria outside of class to help him keep up with his Database classes.
- Python/Flask: Experimented with creating user interfaces.
- Tableau: Created a detailed report showing COVID-19 data for every county in the United States.

Work Experience

PHP Developer

September 2021 – Present

Vanderhall Motor Works

Springville, Utah

- Integrated and automated system processes with third-party APIs.
- Built out new, intuitive interfaces to exceed customer specifications using Ajax, JQuery, MySQL, and PHP.
- Solved problems company-wide as the lead developer.

Software Implementation Intern

April 2021 – July 2021

FORZA

Norcross, Georgia

- Published 40+ dynamic SQL reports to aid system processes at client site.
- Taught end users how to automate processes with macros and Excel Power Queries.
- Forged effective relationships with users to close tickets satisfactorily.
- Diagnosed problems in system processes and advised corporate leadership on solutions regularly.
- Trained end users and fielded questions as the on-site FORZA representative.
- Documented solutions for errors raised for future reference.

Billing Representative

May 2020 – April 2021

Milner, Inc.

Norcross, Georgia

- Managed billing and customer relations for over 160 customer accounts.
- Recognized pain points in daily data cleaning routines and automated the processes using macros in Excel.
- Digitized billing notes to reduce paperwork and human error. Implemented new spreadsheet which became new standard for Billing Representatives.

Volunteer Work

Software Development Consultant

April 2021 – Present

Oryx Software Project

- Assisted in the transfer of web hosting from a private server to AWS.
- Cleaned and matched data for over 70k rows of data.
- Developing and refining the user interface and web app functionality using the Laravel framework.
